

## Foster growth and development for your people with tailored training opportunities.

You can offer an integrated learning management solution that actively involves employees and ensures learning is aligned with your compliance, training, and developmental objectives. It facilitates a comprehensive and customizable approach to education and employee growth.

### How it Works

Learning easily tracks necessary skills and manages training opportunities to grow and develop your people, ensuring they remain equipped for current and future challenges in the workplace.

### Benefits

**Real-time Tracking and Reporting:** Get real-time insights into employee learning progress and course completion. Streamline alerts and reminders through automated notifications to ensure employees are completing their assigned learning.

**Course and Content Management:** Effortlessly store, organize, and distribute content. Categorize and tag content to ensure it reaches the right audience. Create courses seamlessly by dragging and dropping PDFs, videos, SCORM files, and more.

**Engaging Employee Experience:** Create an exceptional employee experience by empowering them to share knowledge, monitor progress, and inspire each other through gamification and collaboration tools accessible anytime and from any device.

### Benefits for HR Professionals

- Streamline and automate employee and new hire learning and training administration.
- Enhance business outcomes with a comprehensive approach to learning and development.
- Boost employee engagement and foster a more connected culture through feedback and continuous learning.
- Minimize compliance risks associated with inadequately tracked or documented training efforts.

### Benefits for Employees

- Access learning and training effortlessly while on the job, anytime, and from any device.
- Advance their careers through skill and knowledge development.
- Engage with colleagues, share expertise, and seek feedback opportunities.
